

Sydney Feral Animal Control Pty Ltd

Urban Shooting

Sydney Feral Animal Control Pty Ltd has purpose modified an EZiGO electric buggy for use as a specialised urban shooting vehicle. This unit can be used for

- Fox Shooting
- Duck Shooting
- Cockatoo Shooting
- Feral Cat Shooting
- Rabbit Shooting
- Feral Pigeon Shooting

This electric shooting vehicle has the advantage of running quiet and when used in conjunction with a rifle and a silencer the shooting operation becomes barely noticeable.

The operator can shoot from a sitting position using a steady swivel mount that allows for super accurate shooting or from a standing position with a padded gun rest.

The buggy is set up so that anything that is shot can be picked up and stored in the ute body, out of view of anyone not connected with the shooting operation. The operator has on hand tools that allow him to euthanase any birds or animals that have not died instantly.

All shooting is carried out by licensed professional operators who are fully covered by company insurance. In all instances all permits that are required are put in place before the shooting operation commences. The Local Area Command (Police) is notified before and after the shooting operation.
